Autism Spectrum Disorder (ASD) Resources

What is Autism? Autism, or autism spectrum disorder (ASD), refers to a broad range of conditions characterized by challenges with social skills, repetitive behaviors, speech and nonverbal communication. According to the Centers for Disease Control, autism affects an estimated 1 in 54 children in the United States today.

We know that there is not one autism but many subtypes, most influenced by a combination of genetic and environmental factors. Because autism is a spectrum disorder, each person with autism has a distinct set of strengths and challenges. The ways in which people with autism learn, think and problem-solve can range from highly skilled to severely challenged. Some people with ASD may require significant support in their daily lives, while others may need less support and, in some cases, live entirely independently.

Several factors may influence the development of autism, and it is often accompanied by sensory sensitivities and medical issues such as gastrointestinal (GI) disorders, seizures or sleep disorders, as well as mental health challenges such as anxiety, depression and attention issues.

Signs of autism usually appear by age 2 or 3. Some associated development delays can appear even earlier, and often, it can be diagnosed as early as 18 months. Research shows that early intervention leads to positive outcomes later in life for people with autism.

** In 2013, the American Psychiatric Association merged four distinct autism diagnoses into one umbrella diagnosis of autism spectrum disorder (ASD). They included autistic disorder, childhood disintegrative disorder, pervasive developmental disorder-not otherwise specified (PDD-NOS) and Asperger syndrome.*

Data shows that as of 2018 nearly 1 out of 54 children may have ASD. Boys are 4 times more likely than girls.

Island County Autism Spectrum Disorder Resource Website

Autism Partnership of Island County presents an Island County ASD website of resources for families. Have a concern? Need a screening? Need resources? Need support? <https://www.pilotace.org>

LEARNING ABOUT AUTISM

- **Autism Speaks** www.autismspeaks.org(888)288-4762 (888)AUTISM2
The Autism Response Team (ART) is an information line for the autism community. Our team members are specially trained to provide personalized information and resources to people with autism and their families. Part of Autism Speaks.

- **100 Day Kit for Young Children** - Knowledge is power, particularly in the days after an autism diagnosis. The Autism Speaks 100 Day Kit helps families of children ages four and under make the best possible use of the 100 days following the diagnosis. This kit will help you learn more about autism and how to access the services that your child needs. It contains information and advice collected from trusted experts on autism and parents like you.

For Young Children: <https://www.autismspeaks.org/tool-kit/100-day-kit-young-children>

For School Age Children: <https://www.autismspeaks.org/tool-kit/100-day-kit-school-age-children>

The 100 Day Kit is divided into the following sections: About Autism, Diagnosis, Causes and Symptoms, You, Your Family and Autism, Getting Your Child Services, How is Autism Treated? Making It Happen, A Week by Week Plan for the Next 100 Days, Useful Forms, Glossary and Resources

Autism Speaks has autism info available in the following languages: Arabic (العربية), Bangla (বাংলা), Bosnian (Bosanski), Cambodian (ខ្មែរ), Chinese (中国的), French (Français), Greek (ελληνικά), Haitian Creole (Kreyòl Ayisyen), Korean (한국어), Laotian (ລາວ), Portuguese (Portuguesa), Romanian (Română), Russian (русский), Serbian (српски), Somali (Af-Soomali), Spanish (Español), and Vietnamese (Tiếng Việt)

- **Autism Society** www.autismsociety.org(800)3-AUTISM
The Autism Society's website is one of the most visited websites on autism in the world and our on-line resource database, Autism Source, and National Contact Center (800-3-AUTISM) provide information and service referrals to thousands of people each year.
- **Washington State Department of Health Autism Guidebook** - Is very large and cumbersome but has some great ideas. <https://doh.wa.gov/sites/default/files/legacy/Documents/8340//970-NonDOH-AutismGd-en-L.pdf>
- **Conversations about Autism: Seattle Children's Hospital** Conversations About Autism is a series of 60-minute live-streamed sessions created for providers and caregivers of children with autism who wish to better understand the autism spectrum disorder. In these sessions, experts and advocates from our region share their knowledge and perspectives on autism as well as helpful tips for supporting a child, adolescent or young adult with autism. <https://www.seattlechildrens.org/health-safety/keeping-kids-healthy/development/conversations-about-autism/>
- **Resources for Families from UW Autism Center**
<https://depts.washington.edu/uwautism/>
- **The Arc Autism Now** The nation's source for resources and information on community-based solutions for individuals with autism, other developmental disabilities, and their families. A national initiative of The Arc. <http://autismnow.org>

WHAT IS APPLIED BEHAVIOR ANALYSIS (ABA)?

What is Applied Behavior Analysis? Applied Behavior Analysis (ABA) is a therapy based on the science of learning and behavior.

Behavior analysis helps us to understand: How behavior works, How behavior is affected by the environment, How learning takes place,

ABA therapy applies our understanding of how behavior works to real situations. The goal is to increase behaviors that are helpful and decrease behaviors that are harmful or affect learning.

ABA therapy programs can help: Increase language and communication skills, Improve attention, focus, social skills, memory, and academics, Decrease problem behaviors

The methods of behavior analysis have been used and studied for decades. They have helped many kinds of learners gain different skills – from healthier lifestyles to learning a new language. Therapists have used ABA to help children with autism and related developmental disorders since the 1960s.

IFSP Individualized Family Service Plan- Ages Birth to 3 years old

No Referrals Needed! The IFSP is a written treatment plan for Early Intervention (EI). It details your child's current levels of functioning, specific needs and goals for treatment (referred to as outcomes). The first step in writing the IFSP will be for the members of your child's team to conduct various types of assessments to identify your child's individual strengths and needs. The IFSP will include information about your child's current level of development in the following areas: Physical development, Cognitive development, Communication development, Social & emotional development, Adaptive development, Fine and gross motor skills, Vision, Hearing, etc. The IFSP is developed with input from the child's entire family, and it includes features that are designed to support the entire family. Whidbey Island: Toddler Learning Center **(360)679-1039** Camano Island: Sherwood Community Services **(360)629-1236**

IFSP	IEP
Birth through age 3	Age 3-21
Is inclusive of the family's needs	Focuses on the child's needs
Services provided in natural environments	Services provided at school
Families are assigned a service coordinator	No service coordinator
Generally reviewed every 6 months	Generally reviewed 1x per year
IFSP Team makes decisions	IEP Team makes decisions
Governed under Part C of IDEA	Governed under Part B of IDEA

IEP Individualized Education Program- Ages 3 to 21 years old. Special Education

Approximately 143,000 eligible students in Washington State receive special education and related services. The Office of Superintendent of Public Instruction (OSPI) fulfills the requirements of the federal Individuals with Disabilities Education Act (IDEA), which ensures all children with disabilities have access to a free appropriate public education. To find your local contact information check page 5 for Child Find.

AUTISM RESEARCH & ADVOCACY

- **Washington Autism Alliance and Advocacy** www.washingtonautismadvocacy.org
Our mission is to ensure that all children and adults with Autism Spectrum Disorders (ASD's & other developmental disabilities (DD's) have every opportunity to thrive and become productive members of society. We do this by helping families' access ASD & DD health insurance benefits, effective services in schools, and supportive community-based services, regardless of their personal financial situation.
- **WA PAVE: (800)5-PARENT** The process of special education can feel overwhelming for parents already working hard to manage home and medical challenges. This is for parents of students ages 3-21, with known or suspected disabilities, who may have unique educational needs that require additional supports and services through an Individualized Education Program (IEP) or a Section 504 Plan.

Intake & Eligibility(425) 977-6520

- **Island County Developmental Disabilities** Mike Etzell(360)678-7883

Coordinates, funds, and manages local services for children from birth to three and for adults 21 and over who have developmental disabilities. We work actively with families, schools, the business community, as well as local, state, and federal governments to facilitate full contribution for all citizens who experience developmental disabilities. Our underlying belief is that all individuals with developmental disabilities have the skills, interests, and talents to enhance their community and have a responsibility to do so. We also know that employment is a powerful way to contribute both to the larger community as well as to continue to grow and learn. MikeEt@islandcountywa.gov
