

PARENTING IN RECOVERY WEBINAR

Thursday | May 19th | 12PM - 1PM

Supporting parents through substance use, stigma, and caring for kids with prenatal substance exposure.

Parenting children with prenatal substance exposure (PSE) can be very challenging, and parents in recovery from substance use face unique obstacles.

Join Hope RISING Clinic providers and parents for a conversation and live Q&A as we address parenting kids with PSE, separation and reunification, and resources to support this growing population.
